Product Obsolescence Notice

Biffi Subsea Actuators, OFO – OFOS - OFROV

After a careful evaluation of the current market situation and the overall Biffi product range the decision has been made that Biffi subsea actuators product lines (Biffi mod OFO mod OFOS and mod OFROV) will be discontinued, effective immediately.

Biffi subsea product range has been available to the market for 40 years with an extended installed base. Being a highly engineered product, each request was managed as tailor made solution.

Biffi will guarantee technical assistance on the installed base and in case a replacement or refurbishment of the product is needed.

It is possible to have a Bettis solution as alternative.
